

Housing solutions

Welcome to Université Savoie Mont-Blanc and ACCENTS

Unlike some other countries, French universities don't own student residences. Students are usually staying in public or private student residences.

What are the differences between public and private student residences ?

Public student residences (CROUS)

Public student residences are managed by the national institution CROUS. They are highly demanded.

Important : they only accept students up to 28 years old and only for an arrival on September.

How to apply :

- Create your account on : <https://www.messervices.etudiant.gouv.fr/>
- Contact the CROUS, at the following address to get your application form: logement.clous-smb@crous-grenoble.fr

-  • **Send them back your application form and all the required documents before the 15th june**
You will have an answer in mid-July.

Private student residences

Private student residences are managed by private companies. These residences usually offer private studios, really comfortable and more high-end than a public residence, with a lot of services.

How to apply:

Fill the form online on the residence website. You can apply at any moment.

You will have an answer within 1 or 2 weeks.

Filling an application form for a public or a private student residence, doesn't guarantee you to obtain an accommodation.

 **VISA:** To obtain your proof of accommodation, your housing booking must be confirmed, be careful of the answer delivery time of the residences !

Housing solutions

CROUS Public student residences

Public residences usually offer private bedroom with a shared kitchen.

For more information regarding these residences, check the CROUS website :
