DATASUN SCIENTIFIC SCHOOL

14-18 November 2022

Le Grand-Bornand

Chair	14 NOVEMBER Lamia Berrah	15 NOVEMBER Nadia Barbero	16 NOVEMBER Christophe Ménézo	17 NOVEMBER Monika Woloszyn	18 NOVEMBER Etienne Wurtz
	Le Bourget-du-Lac			Le Grand-Bornand	
08:30					
09:00	Welcome coffee				
	Mathieu David PIMENT - UR, FRANCE <i>Solar energy forecasts and their value for the stakeholders of the energy sector</i>	Alexandre Benoit LISTIC - USMB, FRANCE <i>Explainable AI for earth observation</i>	Roberto Castello EPFL, SUISSE <i>Data-driven methods for a large-scale integration of photovoltaic technology in the built environment</i>	Robert Blaga UVT, ROUMANIE <i>Modelling chains for solar resource assessment in the presence of aerosols</i>	Marion Perrin OSCARO POWER, FRANCE <i>Solar digitization, a necessity for massification before and after installation. How data collection helps optimize sizing, operating and sharing?</i>
10:30					
11:00	BREAK	BREAK	BREAK	BREAK	BREAK
	Leon Gaillard HELOCITY, FRANCE <i>Remote diagnostic analysis of solar photovoltaic installations</i>	Evelina Trutnevyte UNIGE, SUISSE <i>Solar PV futures: from national to global levels</i>	Gilles Desthieux HEPIA - HES-SO, SUISSE <i>Solar modelling tools for energy urban planning. Application to the solar cadaster of the Greater Geneva</i>	Demba Diallo GEEPS - UPS, FRANCE <i>Contribution to fault diagnosis of PV modules: analysis of I-V curves</i>	François Maréchal EPFL, SUISSE <i>The importance of systemic approach for the energy transition</i>
12:00					
12:30	Presentation Solar Academy/ USMB/INES/CEA				
14:00	LUNCH	LUNCH	LUNCH	LUNCH	LUNCH
	Visit of INES and INCAS platform	Noura Al Akkari LAMA - USMB - CEA <i>Solar energy prediction using ML algorithms on MATLAB</i>	Robert Blaga UVT <i>An introduction for working with solar data in R</i>	Martin Thebault LOCIE - CNRS <i>Solar potential indicators with QGIS</i>	Activities
16:00		Apolline Ferry LOCIE - USMB <i>Solar potential indicators with QGIS</i>	Alexandre Mathieu HELOCITY - CSTB - USMB <i>Photovoltaic fault detection with Python (Jupyter Notebook)</i>	Alexandre Mathieu HELOCITY - CSTB - USMB <i>Photovoltaic fault detection with Python (Jupyter Notebook)</i>	
16:30		BREAK	BREAK	Noura Al Akkari LAMA - USMB - CEA <i>Solar energy prediction using ML algorithms on MATLAB</i>	
	Travel to Le Grand-Bornand	Poster session	Apolline Ferry LOCIE - USMB <i>Solar potential indicators with QGIS</i>	Robert Blaga UVT <i>An introduction for working with solar data in R</i>	Departure from Le Grand-Bornand (13:30)
18:30				Poster session	<i>Arrival at Chambéry train station at 15:30 and Le Bourget-du-Lac at 16:00</i>
19:30					Gala dinner
