

International Industrial and Business Management

ANNECY - France

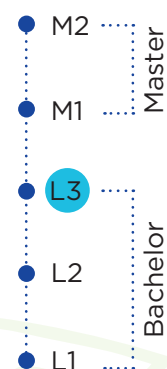

INTERNATIONAL SEMESTER • 15-20 STUDENTS PER YEAR • SINCE 2016

OBJECTIVES OF THE SEMESTER

- Offer international students the opportunity to develop their skills in industrial and business management in one of the most economically-active regions in France. By welcoming students from a wide range of academic backgrounds, we aim to help students develop a full panel of skills. This ranges from the softer management skills (for the more technical and scientific profiles) to more technically oriented areas of study for the more business-oriented.
- Train students by providing them with an international experience both inside and outside of the classroom via company visits and a group project.
- On getting their 30 ECTS, the students will obtain a university diploma from Université Savoie Mont Blanc.

Level of education

Job opportunities

- Business manager
- Industrial manager
- Project manager
- Jobs in the field of international management

“

This international semester is a fantastic opportunity to meet other students from different countries and work on projects together in fields of study essential for a company to be successful today. You will have the chance to discover both a dynamic region and some local companies that are part of it.
